

The Essential Elements of a Successful Post-Acute Transition Process

Key Goals for Providers and Clinicians

- Support patients on their path to optimizing quality of life
- Understand patient and family goals and needs
- Engage with patient consistently; be available and committed
- Evaluate decisions through the lens of health equity
- Practice effective communication, ask questions, and listen carefully
- Provide education to patients and families, with clear explanations
- Ensure the right services and supports are in place for patient going home
- Address underlying concerns and help patient/family feel confident about the care transition
